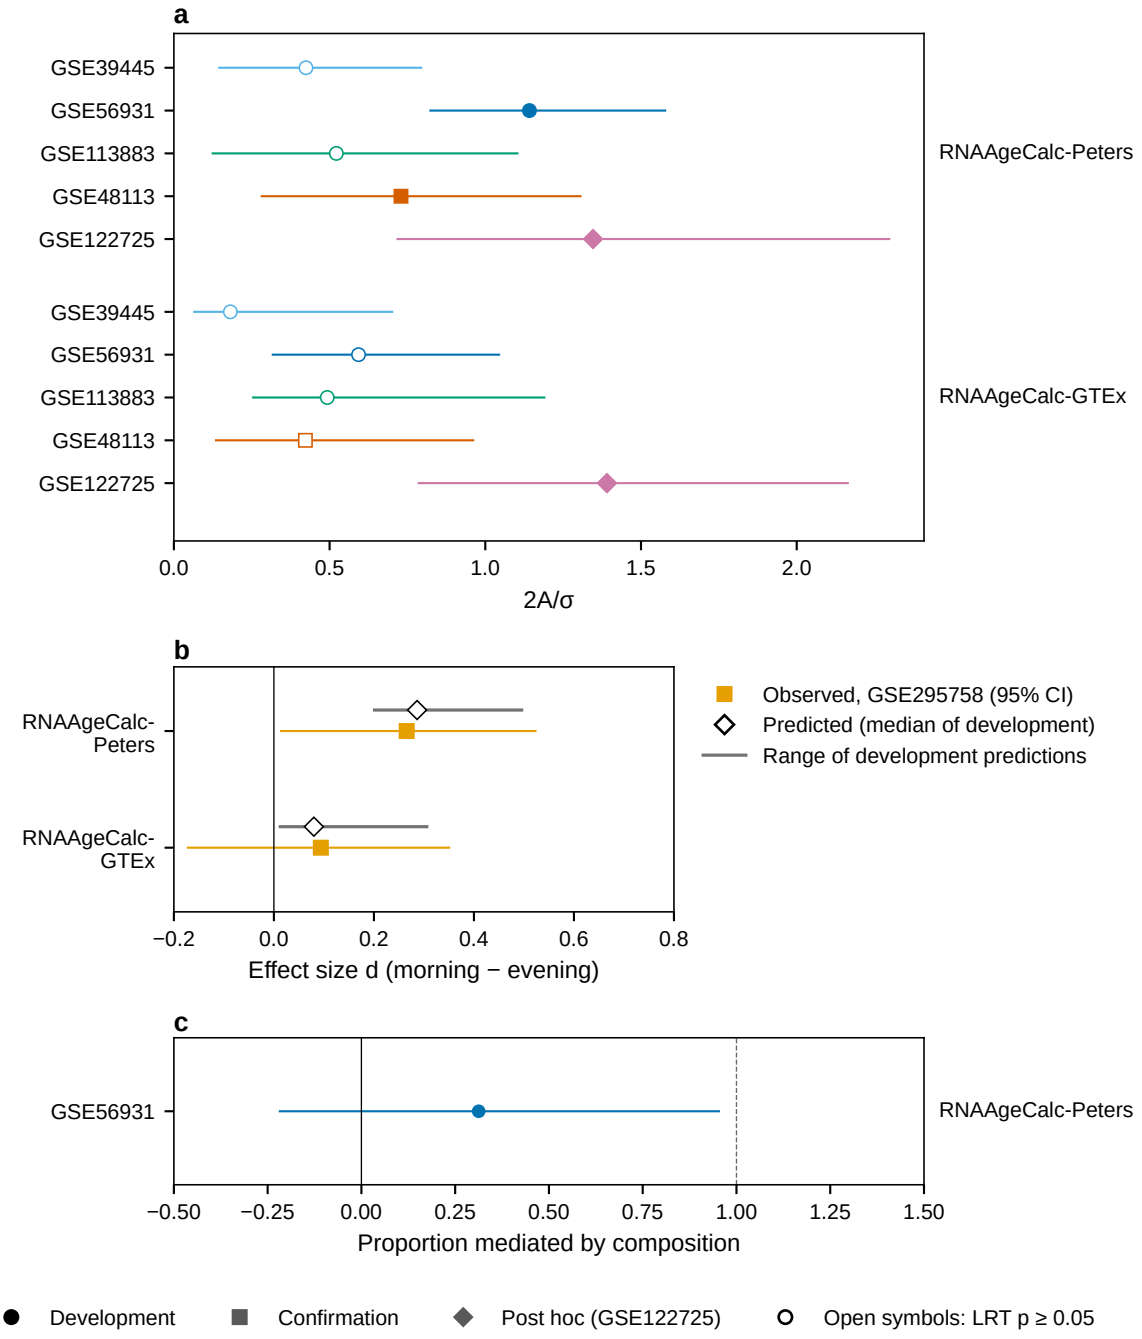

Fig. S1 Effect sizes and composition mediation for the secondary clocks (RNAAgeCalc-Peters, RNAAgeCalc-GTEx), as in Fig. 3a, b and Fig. 4a

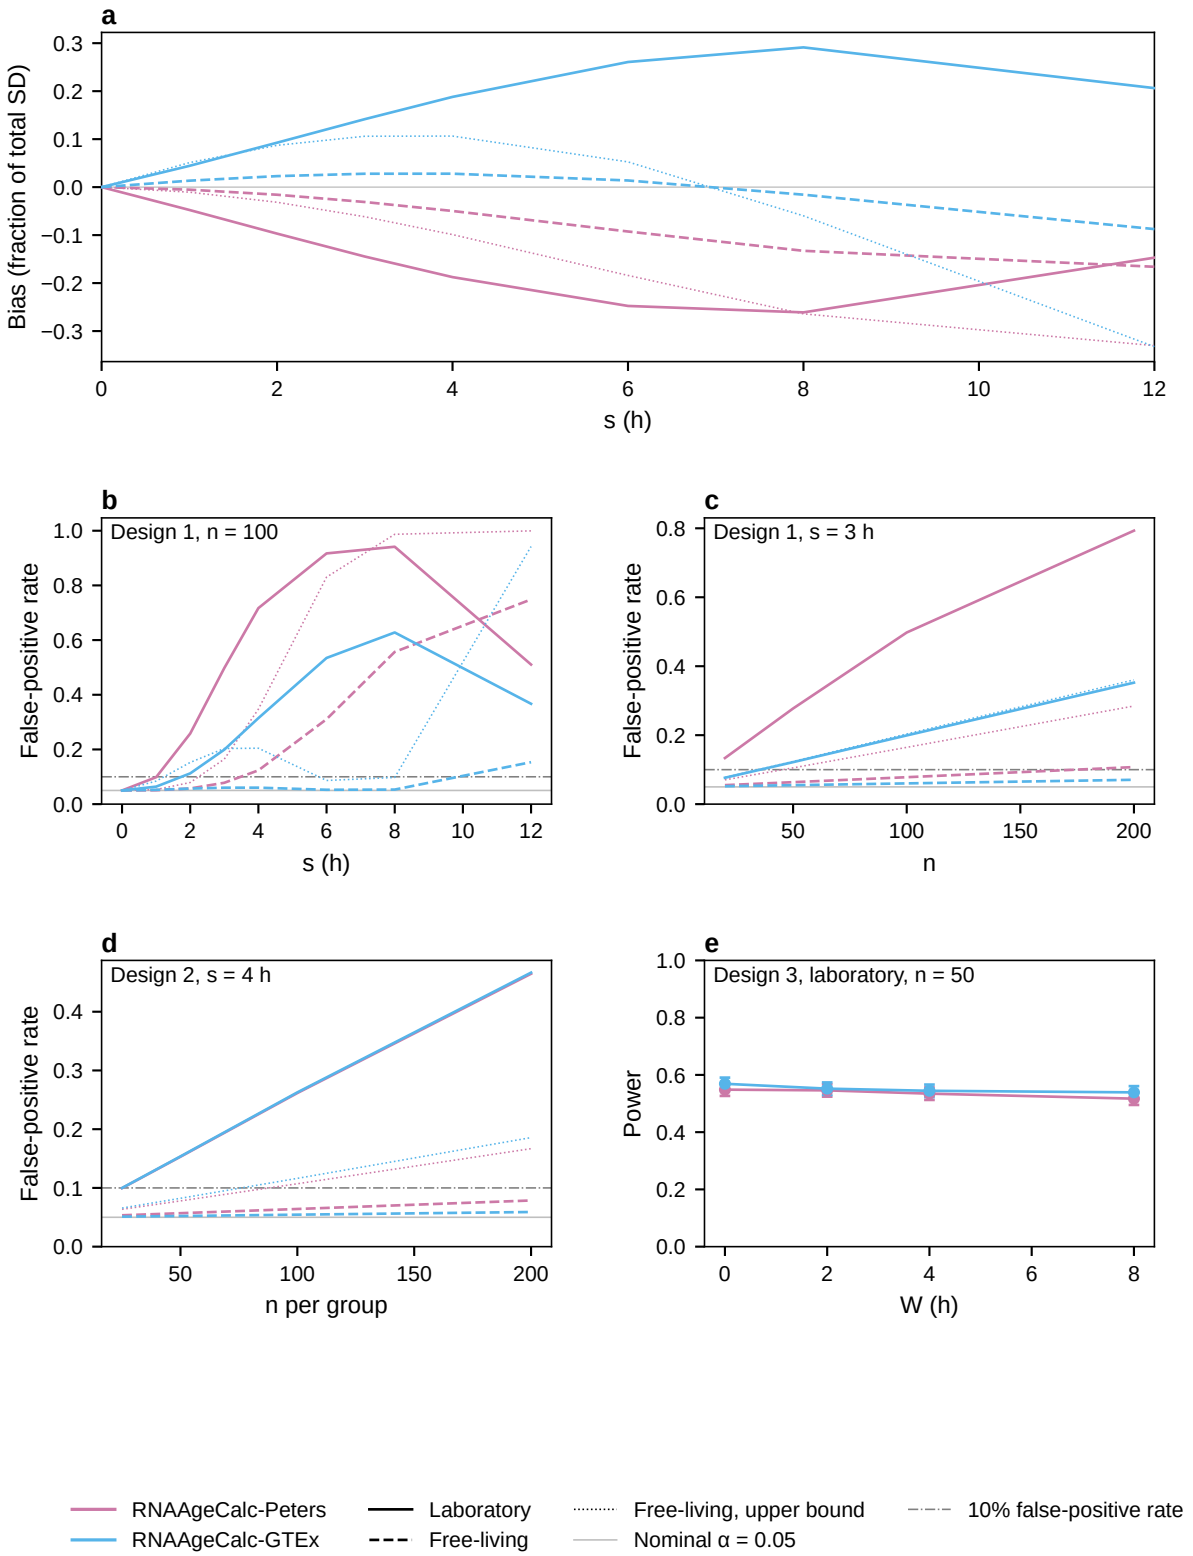

Fig. S2 Bias simulation for the secondary clocks, as in Fig. 7; in d, the laboratory lines of the two clocks coincide because their biases at s = 4 h have equal size (0.19 of the total SD) and opposite sign

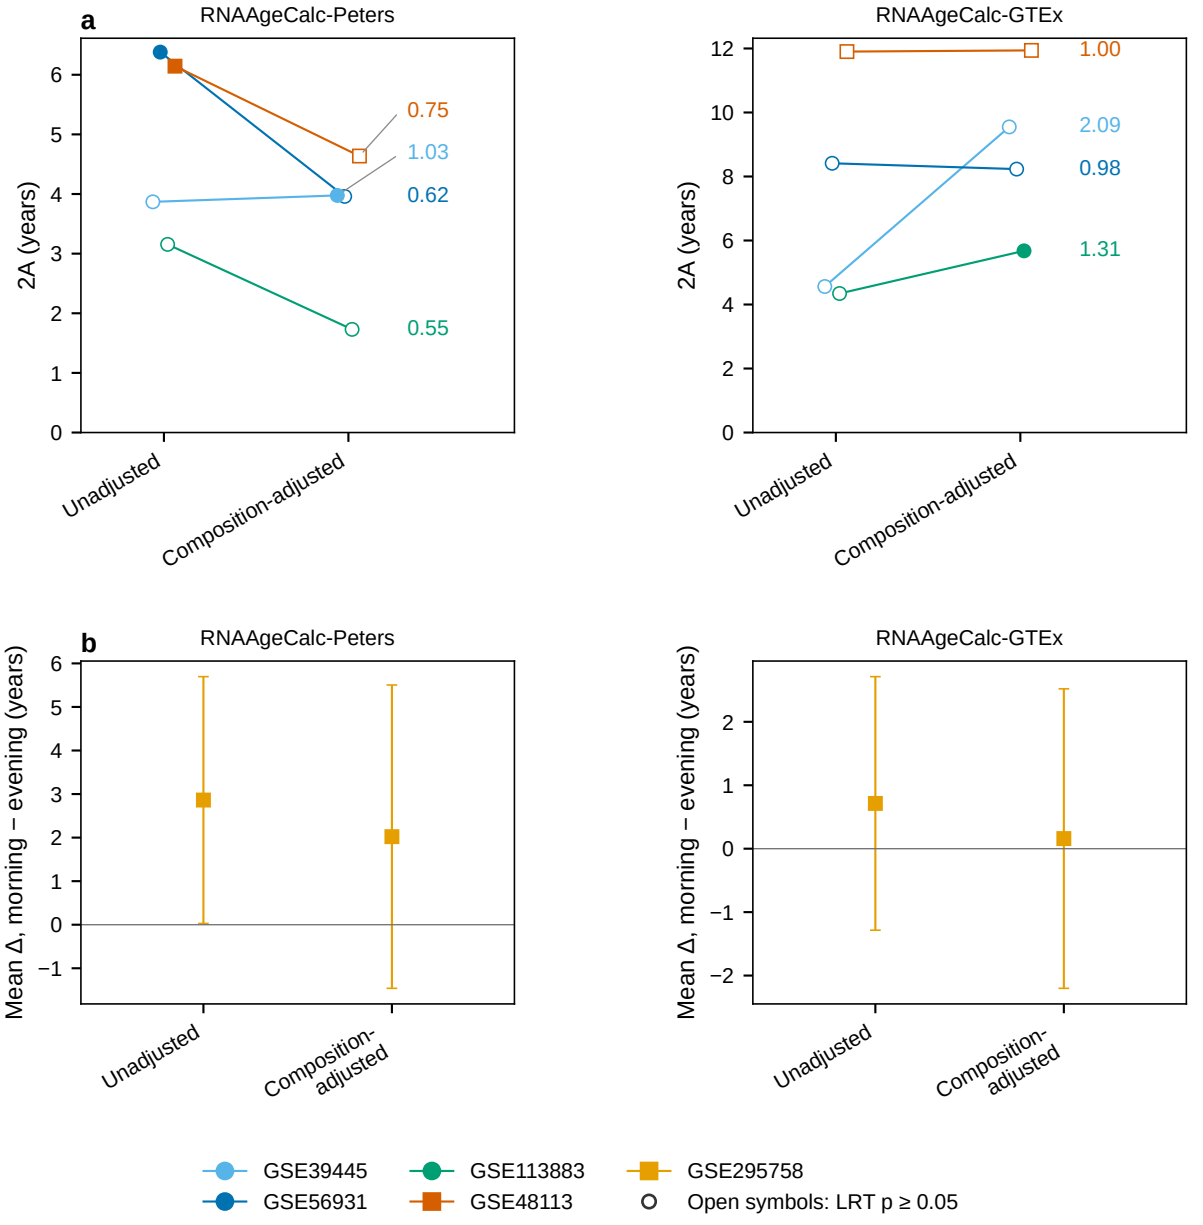

Fig. S3 Mitigation for the secondary clocks, as in Fig. 8; the time correction c was defined for the primary clocks only
